

# CONCUSSION WORKFLOW DIAGRAM

KU Pediatrics, 2016

\*If patient is ever NOT improving on follow up, consider referral to concussion clinic.

\*If symptoms ever worsen on follow-up, refer to concussion clinic.

\*Consider referral for patients with co-morbid complex, chronic medical conditions.

\*Refer patients with history of multiple concussions as management is more complex.

\*If not fully recovered without symptoms within 1 month of accident, refer to concussion clinic.
