

# ***A Few Facts on the Safety of the COVID-19 Vaccine***

It's safe to receive other vaccines the same day as the COVID-19 vaccine.

The COVID-19 vaccines have received the most intensive safety monitoring in U.S. history, according to CDC.

Even though widespread use of mRNA vaccines is new, this technology has been studied for decades.

You cannot get COVID-19 from any COVID-19 vaccine, as mRNA vaccines do not contain any live or dead parts of the virus.

Around 28 million children in the U.S. have gotten a COVID-19 vaccine. Real-world evidence confirms the vaccine safety.

COVID-19 vaccination is recommended for everyone ages 6 months and older.

Talk to your doctor today about having your child vaccinated.

Reported side effects are mild and temporary, like other childhood vaccines.

Serious side effects are rare.
